

Model TU1982 USAR Trailer

BREVARD COUNTY FIRE RESCUE

Rockledge, Florida

Brevard County Fire Rescue serves one of the world's most famous sites, Kennedy Space Center along the Space Coast. The tractor/trailer is specially equipped to handle all technical rescue and search and rescue operations, including water, which is in great abundance in and along the county.

The tractor is a four-door cab Freightliner M2-112 with Caterpillar C13, 410 hp engine. The 41-ft trailer includes dedicated storage facilities for all the technical rescue equipment, boat motors, shoring timbers and panels, full USAR air bag complement and air shores.

A 20kw diesel generator with 20-gallon fuel tank provides independent power for a NightScan light tower, portable flood lights, two cord reels and multiple interior and exterior power outlets.

The tractor and trailer is fully multiplexed to meet all NFPA 1901 requirements. All emergency lights, tail lights, traffic director light bar and compartment lights are LED.

The vehicle can be viewed fully equipped at Fire-Rescue East in Daytona Beach January 28-31. Watch this page for photos of the fully loaded vehicle.

Ramps permit rolling heavy equipment into and out of the compartments. Four roof compartments increase the already huge storage capacity.
