

Model DFC1173R

### Claremore Fire Department

Claremore, Oklahoma

Claremore, located along I-44 just northeast of Tulsa, purchased a Hackney DFC1173R heavy rescue mounted on a Spartan Gladiator 6-man MFD chassis.

The 19-ft, 11-compartment was custom designed to accommodate all the departments specific rescue and support equipment in an easy to access layout. Everything on the apparatus has a dedicated place for rapid retrieval. Two coffin compartments are located on the roof, plus recessed mounting of the NightScan light tower. A 14-ft and two-section 24-ft ladder is stored on the roof. Heavy-duty rollers are provided for loading and unloading of the ladders.

10,000# receivers are provided on the left and right sides of the body and under the rear bumper with 12VDC receptacles for powering a 9,000# Warn winch.

All marker, tail, traffic director light bar, compartment and warning lights on the apparatus are LED. A 35,000 watt PTO generator provides power for hydraulic power unit, light tower, (2) tripod flood lights, (4) upper side body flood lights, front cab brow flood light and (2) cord reels. A utility air hose reel provides remote air source for air bag inflation.

Located on the back wall of the cab is an EMS cabinet with roll-up door.

*Two pre-connected hydraulic rescue tools are stored in the front bumper.*
