

# USAR TRAILERS

**Disasters** – they can be man-made or natural. Because no two are alike, you must be ready to respond to anything, anytime, anywhere.

Now you can move those huge cache's of specialized equipment to the scene in a single response vehicle. Hackney offers a broad line of trailers tailored to your specific requirements, from light duty 9-compartment models to super heavy 20-compartment models.

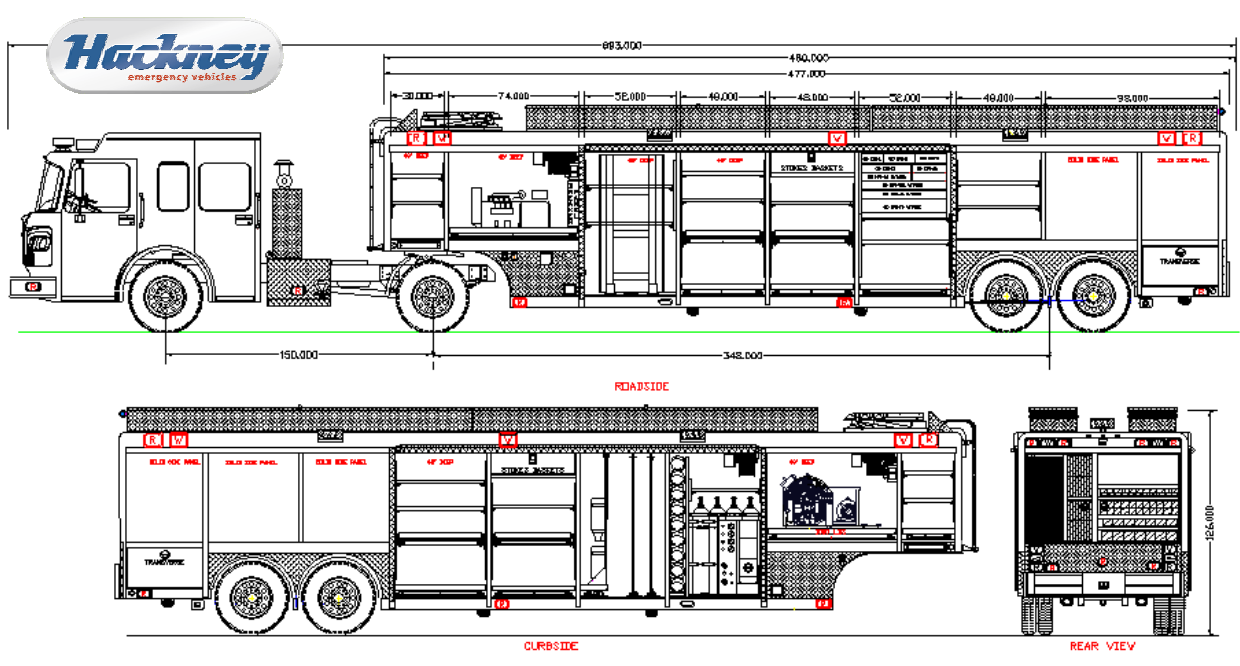

Hackney provides nationwide on-site design assistance from our regional factory team of experts. They in turn will team up with factory engineers who insure that all the equipment and logistics requirements you might have might be incorporated into a single response vehicle. And, if budget constraints are an issue, we can guide you through design concepts that will meet that critical requirement as well. Call us for the factory representative nearest you.

9-compartment light duty Class V rated from 9900 to 14,000 lbs.  
All roll-up doors permit immediate equipment access.

## Pasadena Fire Department, CA – Model TU1982

Rotary-screw PTO compressors from 85 to 370 cfm

Regardless of your departments unique requirements, Hackney has a solution for moving that huge compliment of specialty equipment to the scene. Once there you have all the support ancillary capability that you could ever want in one easy-to-maneuver apparatus. In fact, although some tractor-trailer models can exceed 60-ft in overall length, they can be maneuvered into spaces some 32-ft apparatus can not go.

Tractor-to-trailer umbilical connection for DOT, multiplexing, air and generator

Shown with typical USAR timber compliment

Tractor can vary depending on your requirements and budget. Everything from a 2-door or 4-door commercial to a Spartan custom cab. Horsepower can range from 300 to 500. Command centers are available in the tractor or trailer.

Portable or fixed front bumper winches

Shown with FEMA pallet loaded cache, 60-kw diesel generator and 26 cfm air compressor

400 Hackney Avenue – Washington, NC, 27880, USA
